

General and Misc. Questions

What is Dragon Court?

Dragon Court (DC) is a java based, role-playing game (RPG) created by FFiends, Inc. It is fun, simple, yet addictive little game. It is free, all you have to do is register a new character (if you don't have one already) to your (working) e-mail account. Because DC is a java appalet, you have to download nothing unless you internet browser doesn't support java, then you have to download a plugin for free.
