

General and Misc. Questions

What does the "Wheel of Fates" do?

The Wheel of Fates appears before you no more than once per day. When it appears, you have the choice between 6 weapons or items. If you select correctly, then you win that item. If you select incorrectly, then you win nothing.

More details:

The appearance of the Wheel is not random per se; when you login for the first time that day, the code will "select" a quest for the Wheel to show up. Therefore, if you lose that particular quest (i.e., by dying), then you won't see the wheel.

No silvers, crystals or frys are given out by the wheel.

Your chance of picking correctly is 1/6 (~17%).

You can encounter the Wheel in all questing areas plus the court.
