Formula for maximum enchant scrolls

Take the base stats of the item and plug it into the following formula: $3 \times \text{Attack} + 2 \times \text{Defense} + \text{Skill} = \text{total number of Enchant Scrolls}$

For example, a +50a+80s Spirit Katana can hold $3 \times (50) + 2 \times (0) + (80)$, or 230 Enchant Scrolls

Unique solution ID: #1041
