

Items

Where can we get a major shipment of enchant scrolls? I remember there was a shop selling them, but when I went there wasn't anymore scrolls being sold.

You can no longer buy Enchant Scrolls in the game. After Fred implemented the item limit when purchasing, players discovered a bug that would allow them to buy more items than he intended.

The best source of Enchant Scrolls is questing and trading with other players. You can find them on monsters in the zones on in the Ocean (Shangala, Hie Brasil, Azteca).
